Notice of Fee Increase on October 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2003. See Revision of Patent Fees for Fiscal Year 2004; Final Rule, 68 Fed. Reg. 41532, 41533, 41534 (July 14, 2003).

The current fee schedule is accessible from (<http://www.uspto.gov/main/howtofees.htm>).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2003 (or mailed with a certificate of mailing on or after October 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2003, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
- By a small entity (Sec. 1.27(a))..... \$665.00
 - By other than a small entity..... \$1,330.00
- (b) Issue fee for issuing a design patent:
- By a small entity (Sec. 1.27(a))..... \$240.00
 - By other than a small entity..... \$480.00
- (c) Issue fee for issuing a plant patent:
- By a small entity (Sec. 1.27(a))..... \$320.00
 - By other than a small entity..... \$640.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER'S COMMENT/REASONS FOR ALLOWANCE

Examiner's comment

1. Amendment after Final rejection, Paper No. 11 has been entered, because such amendment is believed to place the Application in condition for allowance for the reasons discussed below.

Allowable Claims

2. Claims 1, 3-17, 20-36 are allowed over the prior art of record.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: The closest prior art of record are: EP 0261 942; JP 50-150,793; Matyjaszewski et al (5,807,937 or 5789487).

EP'942 discloses a branched polymer obtained by polymerization of vinyl polymer, which is in turn made by a radical polymerization as a macromonomer having one polymerizable double bond per molecule at the terminal, wherein the monomeric units comprise acrylates, acrylic acid, styrene, acrylonitriles, etc. The formula of a macromonomer is presented on page 2, lines 30-55 (see also abstract). The macromonomer composition of EP'942 is prepared by polymerization process employing specific cobalt chelates as chain transfer agents. The polymerization to obtain a macromonomer is carried out in a presence of conventional free radical initiator employing any known methods of polymerization. The macromonomers of EP'942 are

Art Unit: 1713

useful to produce graft polymers which are useful in coating and molding resins , etc. A polymer having Mw/Mn 1.63 can be obtained .

JP'793 discloses comb type block copolymer prepared by copolymerising reaction products of polyalkyl methacrylate and unsaturated acid chloride(s) with hydrophilic monomers. Such butylmethacrylate was emulsified and in the presence of . H₂O₂. and reacted with methacrylchloride.

Matyjaszewski discloses process of living atom (or group) transfer radical **polymerization** for the synthesis of novel homopolymer or a branched polymer. Several Pst macromonomers containing polymerizable double bonds can be obtained in a controlled manner. The NMR spectrum of Polystyrene initiated with vinyl chloroacetate in the presence of 1 molar of CuCl and 3 molar equivalent of bipy at shows signals assigned to vinylic end-groups. A macromonomer that is used in the presence of a vinyl monomer, a transition metal compound, and a ligand to form a branched copolymer, exhibiting a well defined molecular architecture. The term "macromonomer" refers by Matyjaszewski' to a macromolecule having at least one polymerizable site.

Art Unit: 1713

However, as presently amended the terminal polymerizable double bond containing group of the instant polymer differs from that of macromonomer of EP'942 by having a carboxyl anion attached to a carbon bearing the double bond.

JP'793 does not disclose the polymer having a terminal group as appears in presently amended claim 1.

Matyjaszewski'937 and 487 provide for polystyrene macromonomers containing terminal polymerizable double bonds moieties the closest of which is derived from vinyl chloroacetate and has an oxygen atom directly attached to the carbon bearing double bond. This is not the structure of presently amended claim 1.

No other prior art that anticipates or suggests fairly the instant claims has been located as of the date of this Office Action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
